## ORGANIZATION OF BUREAU OF STATISTICS.

---

Statistician and Chief: VICTOR H. OLMSTED.

Associate Statistician: CHARLES C. CLARK.

Assistant Statistician: NAT. C. MURRAY.

Chief Clerk: ELMER J. LUNDY.

Division of Domestic Crop Reports: FRED. J. BLAIR, *Chief*.

Division of Foreign Markets: GEORGE K. HOLMES, *Chief*.

Editorial Division and Library: CHARLES M. DAUGHERTY, *Chief*.

Crop Reporting Board:

*Chairman*, VICTOR H. OLMSTED, *Statistician and Chief of Bureau*.

Four other members chosen each month from the following:

CHARLES C. CLARK, *Associate Statistician*.

NAT. C. MURRAY, *Assistant Statistician*.

GEORGE K. HOLMES, *Chief of Division of Foreign Markets*.

One or more persons called in from the corps of special field agents and State statistical agents.

Issued October 5, 1907.

## LETTER OF TRANSMITTAL.

---

U. S. DEPARTMENT OF AGRICULTURE,  
BUREAU OF STATISTICS,  
*Washington, D. C., July 1, 1907.*

SIR: I have the honor to transmit herewith a compilation of statistics of the imports of farm and forest products for the year ending June 30, 1906, with those for two previous years given for comparison. The data have been derived from the Bureau of Statistics of the Department of Commerce and Labor, and the work of compiling has been done by the Division of Foreign Markets, under the direction of its chief, George K. Holmes.

This report is intended as a continuation of a series of bulletins on the same subject designed for the use of this Department and to meet the demands of a large number of correspondents. They contain an arrangement of the statistics and a determination of totals, with various comparisons, not presented in any other publication.

It is respectfully recommended that this report be published as Bulletin No. 52 of this Bureau.

Very respectfully,

C. C. CLARK,  
*Acting Chief of Bureau.*

HON. JAMES WILSON,  
*Secretary of Agriculture.*

## EXPLANATION OF TERMS.

IMPORTS.—Goods from a foreign country entered at a customs-house.

IMPORTS FOR CONSUMPTION.—The term “entry for consumption” is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion. Some of them may be afterwards exported.

FOREIGN EXPORTS OR REEXPORTS.—Goods which have been imported into this country, either for reexport or for consumption, and are afterwards exported, having undergone no change in form or condition or enhancement in value by the application of labor in the United States.

DOMESTIC EXPORTS.—Goods produced or manufactured in this country from either domestic or imported raw materials, and which are shipped to foreign countries.

TRANSIT OR IN TRANSIT TRADE.—Goods from a foreign country passing through the United States on the way to the same or another foreign country.

TRANSSHIPMENT TRADE.—Goods from a foreign country received at a United States port and there reshipped to a foreign country without being entered as an import into this country.

In transit and transshipment trade is not included in the imports and exports of the United States, but is reported separately.

THE COUNTRY OF CONSIGNMENT is that which is mentioned in the exporting or importing documents as the one from which or to which the merchandise is to be shipped. The regulations of the Bureau of Statistics, Department of Commerce and Labor, are:

Collectors will consider the country in which merchandise was invoiced as the country whence the same was imported in the United States.

In export statements the countries stated should be, so far as can be ascertained, those for which the exports are destined for a market. \* \* \* Exporters will be required to state in their manifests of goods exported the country of ultimate destination.

The country from which or to which goods are consigned may or may not be the country of origin or ultimate destination, as the case may be. The foregoing regulation with regard to the country of ultimate destination in export statements does not result in a material representation of countries of ultimate destination in place of countries of consignment in the records of the exports of this country, when these two countries are not the same.

VALUES.—The values of imported articles subject to *ad valorem* duties are defined by the act of Congress of June 10, 1890, as—

The actual market value or wholesale price of such merchandise as bought and sold in usual wholesale quantities at the time of exportation to the United States in the principal markets of the country from whence imported, and in the condition in which such merchandise is there bought for exportation to the United States or consigned to the United States for sale, including the value of all cartons, cases, crates, boxes, sacks, and coverings of any kind, and all other costs, charges, and expenses incident to placing the merchandise in condition ready for shipment to the United States.

The value of all other imports, whether subject to specific duty or free of duty, is also determined according to the law just quoted.

*The value of domestic exports* is their declared value at the time of exportation in the ports of the United States whence they are exported, which the law requires to be stated under oath, with penalty for misstatement.

*The value of foreign exports* when shipped directly from bonded warehouses (usually dutiable goods) is their import value, but when not shipped from bonded warehouses (usually free goods) the value is determined in the same manner as that of domestic exports.

*Goods in transit* through the United States from one foreign country to another are valued in the same manner as imports.

*Valuation deceptions.*—The value of imported articles subject to *ad valorem* duties is believed to be determined with more accuracy, according to the legal method of valuation, than other imports (whether subject to specific duties or free) and exports; the valuations of dutiable imports and of exports dutiable in foreign countries tend to understatement, and the valuations of imports that are free of duty are liable to inflation for the purpose of trade deception.

**WEIGHTS.**—In the official trade returns of the United States, the *weights* of all articles exported are net weights, and also the weights of all imports, except those which are subject to a specific duty, levied upon the weight of the packages, including the weight of the article itself, together with some or all of its coverings. All tons mentioned in this bulletin, except where it is otherwise stated, are long tons of 2,240 pounds.

**DISCREPANCIES IN FOREIGN TRADE STATISTICS** of various countries are partly due to different methods of estimating values, of determining countries of origin and destination, and of classifying merchandise, and to differences in dates. The United States does not regard *c. i. f.* value (cost, insurance, freight) as the value of either exports or imports (except some foreign exports), while the United Kingdom, for instance, includes these in the value of its imports. It is said that these charges are often erroneously included by British shippers in their statement of export values, especially when the selling price includes insurance and freight.

The United States trade returns include the free ports of Hamburg, Bremen, and Lübeck, in Germany, while the statistics of the German Empire do not.

In consequence of various sources of discrepancy, it is generally futile to undertake to balance an export of this country by any official statement of import into a foreign country, and often there is not an approximate agreement.

**NONCONTIGUOUS POSSESSIONS.**—The noncontiguous possessions of the United States are those not included between Canada on the north and Mexico and the Gulf of Mexico on the south, and between the Atlantic and Pacific oceans. The trade returns of all the possessions of this country, except the Philippine Islands, are included in the total trade of the United States. In the trade statistics for any noncontiguous possession all other noncontiguous possessions, except the Philippine Islands, are included with the United States; thus shipments from Hawaii to Guam are included in the total shipments from Hawaii to the United States.

## IMPORTS OF FARM AND FOREST PRODUCTS, 1904-1906.

---

### GENERAL SURVEY.

The value of all merchandise imported into the United States during the year ending June 30, 1906, was larger than that of any previous year and amounted to \$1,227,000,000. The value of farm products imported during this year was also the largest on record and equaled \$554,000,000, or 45.2 per cent of the total imports. For the seventeen years ending with 1906, farm products constituted 49.1 per cent of the total imports of merchandise. The tendency during these years has been for imports of farm products to increase, as measured by value, more slowly than imports of other goods. During 1890-1894 farm products constituted 51 per cent of the total; in 1895-1899, 51.1 per cent, and for the period 1900-1904 the percentage was 46.7. The highest percentage was in 1894, when farm products formed 55.8 per cent of the total, and the lowest was in 1906, as may be seen in Table 1.

Forest products imported into the United States, according to Table 2, have increased in value from \$46,000,000 in 1896 to \$96,000,000 in 1906, or more than 100 per cent in ten years. The years of greatest increase were 1903, which showed a total \$12,000,000 greater than that of the previous year, and 1905, which exceeded 1904 by \$13,000,000. The value of imports of forest products in 1906 was about \$4,000,000 more than in 1905 and equaled \$96,000,000. Compared with the value of imported farm products, the forest imports are much smaller, the value of the latter in 1906 being but little more than one-sixth of the former.

One of the prominent features of Table 3 is the decrease in 1906 as compared with 1905 in the value of imports into the United States from South America of both farm and forest products, amounting to a total of \$16,000,000. However, the value in 1906 was \$13,000,000 more than in 1904.

Farm products imported from Europe increased \$11,000,000 in 1906 as compared with 1905; from Asia they increased \$8,000,000,

and from Africa \$1,000,000. These gains were almost offset by decreases in the value of imports of farm products from the other grand divisions, so that the net increase for all imports of farm products in 1906 over 1905 was less than one-half million dollars. Most of the forest products imported in 1906, as measured by value, came from countries of North America. The value of this class of imports from each grand division except South America and Oceania was larger in 1906 than in 1905.

The farm products imported into the United States in 1906 were from about 80 different countries. Somewhat less than one-half of these supplied each at least \$1,000,000 worth and their total was \$543,000,000, while the total value of the farm products imported from the other half of the countries was \$11,000,000. The six leading countries of supply, as appears in Table 4, in 1906, as in 1905, were Cuba, Brazil, the United Kingdom, Japan, Italy, and France. An increase of \$6,000,000 in 1906 in the value of this class of imports from the British East Indies placed that group of countries ahead both of Mexico and of the Chinese Empire as a source of supply for farm products. Next in order of importance in this trade are Germany and the Dutch East Indies. Comparing 1906 with 1904, the two countries showing the largest increases were the United Kingdom and the Dutch East Indies, the gain for each being \$10,000,000.

Sixty-two countries contributed to the supply of forest products imported into the United States in 1906; 11 of these, each sending at least \$1,000,000 worth, made up a total of \$86,000,000, while the other 51 countries consigned \$10,000,000 worth. Table 5 shows that in this trade Canada ranked first and Brazil second in 1906, while the position of these countries was reversed in 1905. Imports of this class of merchandise from Canada increased \$5,000,000 in 1906 over 1905, while imports from Brazil decreased by nearly that amount in the same time. Important increases, but smaller than that of Canada, are noted for British East Indies, France, and Argentina.

A summary of the values of the articles given in Table 7 is made in Table 6. The increase of \$8,000,000 in the value of animal matter imported in 1906 over the value in 1905 was due chiefly to the large increase of packing-house products, amounting to \$20,000,000. Important decreases took place in imports of both silk and wool. The value of vegetable matter imported in 1906 was \$8,000,000 less than in 1905, the chief losses being in coffee, sugar, tea, grain, and grain products, while important gains were made in tobacco, vegetable fibers, vegetable oils, fruits, and alcoholic liquors. In imports of forest products lumber gained \$5,000,000 and india rubber lost that amount. Other forest products generally showed gains in 1906 over 1905.
